Why Purchase An EJE 120?

The Jungheinrich® EJE 120 is the most controllable, durable and productive walkie pallet truck you can buy. And, it is exceptionally easy to maintain.

Unlike most other pallet trucks, the EJE120 uses an Industrial Battery instead of a battery power pack.

The Industrial Battery outlasts and outperforms power packs. Save yourself the pain and expense of replacing batteries every year.

Proven to Run Longer

Proven to run longer and move up to 34% more pallets on one charge than the competition and less maintenance required means lower costs.

Plus, the ergonomic design of the EJE120 increases operator comfort and the Incredible turning radius, longest run times and excellent acceleration when loaded and unloaded help enhance productivity.

EJE120 Electric Walkie Pallet Truck
4,500 - 6,000 lb. capacity

All Standard and Included:

- Industrial Battery
- Built-in Charger

RUGGED CONSTRUCTION FOR INDUSTRIAL APPLICATIONS

- Chassis made of high quality, 0.3 inch thick steel
- Rolled steel forks for excellent durability
- 3 degree beveled down forks for easier pallet entry
- Pallet exit rollers for easy pallet exiting

Parts Fast or Parts FREE

As your local Jungheinrich® Dealer, Morrison is committed to providing industry leading customer service. The Parts Fast or Parts Free Guarantee

ensures that your equipment is serviced quickly and efficiently with a 97% parts fill rate. Or its FREE.

Practically Every Operation Could Use One

Suited for a range of applications, the EJE is ideal for low-level order picking, various transport applications and loading / unloading operations at

the shipping dock. And, a variety of options are available to customize the walkie to individual application needs.

The truck's speedCONTROL can be set to provide a consistent travel speed — even if the truck is traveling up or down a ramp.

Extremely maneuverable and able to pinwheel in the trailer with its shorter chassis and 15.3% less steering effort required

Robust, optimized load frame and pallet entry rollers/discs, designed to promote easier pallet entry, with exit rollers being standard.
